DATA ANALYSIS PROJECTS:

- **Exploratory Data Analysis (EDA) On Products reviews-** In the [Exploring the NYC Airbnb Market](#) project, you will apply data importing and cleaning skills to analyse the Airbnb market in New York. You will ingest and combine the data from multiple file types, and clean strings and format dates to extract accurate information.
- **Web Scraping Project-** This project is a simple web application built with Flask that allows users to get the list of reviews from the Flipkart web application. Users can enter a product name using web form, and the list of reviews and comment appears for the user.
- **Web Development Project-** This project is a simple web application built with Flask that allows users to generate QR codes from provided URLs. Users can enter a URL through a web form, and the application converts it into a QR code, which can be downloaded for later use.
